Project Name	BUILDING A WEBSITE USING CANVA

Solution Architecture:

Creating a solution architecture for a website project inspired by the **"Off-White Colours"** brand colours requires careful consideration of various technical and design aspects. Its goals are to:

- Create a modern, minimalistic, and visually striking user interface inspired by Off-White colour's colour palette. Incorporate subtle animations and transitions to enhance the user experience.
- Deploy a web server environment, such as Apache or Nginx, for hosting the website.
- Develop high-quality content, including text, images, and videos, adhering to Off-White's aesthetics and branding.
- Conduct user testing to ensure the website's functionality and design align with Off-White's brand and provide a seamless user experience.
- Choose a reliable web hosting provider and select a hosting plan that suits your website's traffic and resource needs.
- Design the architecture to accommodate future growth and increased traffic.
